CONTENTS OF VOLUME 21

Number 1/2

E. Belardinelli and S. Cavalcanti 1 A new nonlinear two-dimensional model of blood motion in tapered and elastic vessels

M. Arrøe 15 A computerized aid in ventilating neonates

W. Döler, N. Steinhöfel and A. Jäger 23 Digital image processing techniques for cephalometric analysis

N. Foldager and C. G. Blomqvist 35 Repeated plasma volume determination with the Evans Blue dye dilution technique: the method and a computer program

M. Juhola 43 Median filtering is appropriate to signals of saccadic eye movements

Hock-Hin Yeoh 51 Estimation of DNA restriction fragment size using a PC

J. Gregor and E. Granum 55 Finding chromosome centromeres using band pattern information

J. A. Byers 69 Basic algorithms for random sampling and treatment randomization

Software Survey Section I

Number 3

S. E. Greenhut, J. W. Lee, J. C. Monsur and J. M. Nicklas 79 Computer analysis of physiologic signals in a cardiovascular research laboratory

E. Belardinelli, M. Ursino and G. Fabbri 97 A linear propagation model adapted to the study of fast perturbations in arterial hemodynamics

K. Francis 111 The use of the walk test for the development of exercise guidelines

M. P. Mujumdar and C. K. Mitra 121 Selectivity of ionic channels: as seen through computer simulation

J. M. Ribeiro and A. Sillero 131 A program to calculate the isoelectric point of macromolecules

G. Pilz, T. Gurniak, O. Bujdoso and K. Werdan 143 A basic program for calculation of APACHE II and Elebute scores and sepsis evaluation in intensive care medicine

G. Nageswara Rao 161 A PC based computer program to aid the preparation of solvent systems for the HPLC

S. C. Mehta, D. K. Jain and C. K. Gupta 167 Estimation of ED_{50} or LD_{50} using a programmable pocket calculator

M. Wright, G. J. Bakus, A. Ortiz, B. Ormsby and D. M. Barnes 173 Computer image processing and automatic counting and measuring of fouling organisms

Addendum 181

Software Survey Section I

Number 4

W. R. M. Dassen, R. Mulleneers and H. L. L. Frank 193 The value of an expert system in performing clinical drug trials

V. R. Krishnan, C. A. Morbach and Y. W. Brans 199 Autospec^c: computerized processing of the data output from a spectrophotometer in a biochemical laboratory

D. A. Wuthrich, E. E. Ettedgui, P. R. Gordon and S. Gunther 213 A microcomputer-based device to simulate biomechanical environments for cultured cells

J. L. S. Rothman, A. C. Easty, R. C. Frecker and J. S. Floras 221 Development and evaluation of two automated methods for quantifying human muscle sympathetic nerve activity

R. R. Gonzalez Jr and A. D. Auvil 237 Color modulation of Doppler spectra with the use of a personal computer

T. A. Denton and G. A. Diamond 243 Can the analytic techniques of nonlinear dynamics distinguish periodic, random and chaotic signals?

Announcement 265

Software Survey Section I

Number 5

I. Vesely, B. Eickmeier and G. Campbell 267 An automated, video tape-based image archiving system

J. M. Bauer, R. A. Stein and D. M^{c}Pherson 275 Segmentation of high-frequency ultrasound images of atherosclerotic coronary arteries

M. Z. Haque 289 A computational study of convoluted back projection algorithm

S. Szczęsny and B. Turczyński 295 XECT—A least squares curve fitting program for generalized radiotracer clearance model

P. Piloquet, G. Pradal and G. Lefranc 303 Process for analysis of an area delimited by a non-parametric curve and divided into microdomains, and for localization of possible constituents: exploitation by "Digisector" software

M. Aladjem 321 PNM: A program for parametric and nonparametric mapping of multidimensional data

L. Linton, R. M. Sibly and P. Calow 345 Testing life-cycle theory by computer simulation—I. Introduction of genetical structure

R. M. Sibly, L. Linton and P. Calow 357 Testing life-cycle theory by computer simulation—II. Bet-hedging revisited

Software Survey Section I

Number 6

D. A. Hawkins and M. L. Hull 369 A computer simulation of muscle–tendon mechanics

N. H. Mann III, M. D. Brown and I. Enger 383 Statistical diagnosis of lumbar spine disorders using computerized patient pain drawings

S. Fugleberg, A. Greulich and D. I. Stenver 399 Computer-assisted diagnosis of acute azotaemia: diagnostic strategy and diagnostic criteria

C. P. Herbst, J. Diedericks, N. J. Uys, J. Brummer and M. G. Lötter 407 Use of a personal computer for fast acquisition of cardiovascular data over an extended period

B. Smith, J. G. Sarver and R. L. Fournier 417 A comparison of islet transplantation and subcutaneous insulin injections for the treatment of diabetes mellitus

E. C. Klatt 429 Voice-activated dictation for autopsy pathology

W. Schreiner, M. R. Müller, W. Premauer and E. Wolner 435 Computerized acquisition and evaluation of whole blood aggregometry data

G. Nageswara Rao and K. Anand Kumar 443 A microcomputer program to analyze the CD spectrum of proteins and nucleic acids—use of LOTUS 1-2-3 spread sheet

M. I. Kazarnovskaya, S. M. Borodkin, V. A. Shabalov, V. Y. Krivosheina and A. V. Golanov 451 3-D computer model of subcortical structures of human brain

M. E. Jones and K. Taransky 459 Least-squares estimation of enzyme parameters

Software Survey Section I
